

Hostelworld launches app for Apple TV

Hostelworld has today launched a brand new native app for Apple TV that will inspire travel plans and allow adventurers to get under the skin of what hostels have to offer.

The app, which is free to download, will offer users a unique, shared and social experience whilst browsing the app, enabling users to click through over 33,000 properties around the globe, from chic design hostels, to party hostels and everything in-between.

Perfect for groups who are planning an adventure, it's possible to scan through Top Properties and search by city to hunt out destinations that will feed that wanderlust feeling. To aid the decision making process users can read reviews, see what facilities are on offer and draw inspiration from a series of videos on the platform.

Breffni Horgan, Head of Product and Design at Hostelworld, said: "Apple TV is a very exciting new technology that's growing rapidly, so we're thrilled to be launching an app specifically for this device that will bring hostels around the world to life on screen. Perfect for researching that next adventure, this app will enable you and your friends to find the hostel that's right for you from the comfort of your sofa."

The new app is available from the Apple TV App Store from today.
